1. The drawings were received on 1/13/06. These drawings are unacceptable.

Drawing figure 2 contains black lines in the truss.

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the thickness of the ridges and panels as claimed in claims 8 and 16 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

3. Claim 10 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is

Art Unit: 3727

required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 9 was canceled in the amendment 1/13/06.

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 10 recites the limitation "The container" in line 1. There is insufficient antecedent basis for this limitation in the claim.

5. Claims 1, 2, 4, 12 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ewing, Jr. '790, of record.

Member 22 defines the dome while member 16 defines the waist with alternating ribs and grooves to increase the mechanical strength of the container. This is considered to inherently include top load and hoop strength as is well-known in the art.

6. Claims 12, 13 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tanabe et al '992, of record.

Note members 16 and 18 defining an undulating surface or truss construction providing top load strength in the waist portion of the container and inherently providing hoop strength as well.

Art Unit: 3727

7. Claims 1-5 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over the reference as applied to claims 12, 13 and 19 above, and further in view of Gaydosh et al '932, cited by applicants.

To have formed the undulation structure below a dome and between ridges in the manner taught by Gaydosh et al at 44,46 would have been obvious.

8. Claims 6, 7, 14, 15, 20 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over the references as applied to claims 3, 12 and 19 above, and further in view of Musson '020.

To have formed the undulations in the waist as panels with apexes and grooves in the manner of Musson would have been an obvious matter of design choice.

9. Claims 8, 11 and 16-18 are allowed while claims 9 and 22 have been canceled.

10. Applicant's arguments with respect to claims 1-7, 10, 12-15, 19-21 and 23 have been considered but are moot in view of the new ground(s) of rejection.

11. Applicant's arguments, see page 9 of the amendment, filed 1/13/06, with respect to the objection to the disclosure and 112 rejection of claims 5 and 13 have been fully considered and are persuasive. The objection and 112 rejection of claims 5 and 13 have been withdrawn.

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patients show other containers with waists having undulations.

13. The following are suggested formats for either a Certificate of Mailing or Certificate of Transmission under 37 CFR 1.8(a). The certification may be included with all correspondence concerning this application or proceeding to establish a date of mailing or transmission under 37 CFR 1.8(a).
